CONTENTS

Preface ix
The interaction between macrospheres in solution
D. Henderson (Salt Lake City, UT, USA) 1–9
A simple theory of weakly inhomogeneous fluids
A.G. Schlijper and B. Smit (Rijswijk, The Netherlands) 11–20
Classification of adsorption behavior: simple fluids in pores of slit-shaped geometry
P.B. Balbuena and K.E. Gubbins (Ithaca, NY, USA) 21–35
Interfacial properties of lattice models of three-component systems
K.P. Shukla, B. Payandeh and M. Robert (Houston, TX, USA) 37–48
Thermodynamics of fluids of small associating molecules
J.M. Walsh, C.A. Koh and K.E. Gubbins (Ithaca, NY, USA) 49–69
Generalized thermodynamic functions for electrons in a mixture of hard spheres: application to partially ionized nonideal plasmas
T. Kahlbaum and A. Förster (Berlin, Germany) 71–86
Application of high pressure and thermophysical properties of water to biotechnology
T. Makita (Kyoto, Japan) 87–95
Molecular simulation of phase equilibria: simple, ionic and polymeric fluids
A.Z. Panagiotopoulos (Ithaca, NY, USA) 97–112
Nonequilibrium molecular dynamics calculation of the thermal diffusion factor
J.M. Kincaid (New York, NY, USA), X. Li and B. Hafskjold (Trondheim, Norway) 113–121
Hydrate dissociation enthalpy and guest size
E.D. Sloan (Golden, CO, USA) and F. Fleyfel (Houston, TX, USA) 123–140
Calculation of phase diagrams of gas-hydrates
L. Lundgaard and J. Mollerup (Lyngby, Denmark) 141–149
The role of intermolecular forces in the mutual solubility in binary systems at high pressure
J.A. Schouten (Amsterdam, The Netherlands) 151–162
Effect of pressure on the solid–liquid phase equilibria in (water + sodium sulfate) system
Y. Tanaka, S. Hada, T. Makita and M. Moritoki (Kobe, Japan) 163–173
Sonic speed and critical point measurements in ethane by the acoustic resonance method
S.O. Colgate, A. Sivaraman and C. Dejsupa (Gainesville, FL, USA) 175–185
Measurements of the PVT properties of liquid methanol in the temperature range of 200 K to 300 K and up to 50 MPa
V. Vacek (Prague, Czechoslovakia) and A.M. Hany (Assiut, Egypt) 187–198
Quasi-isochoric p-ρ-T measurements, 2nd virial coefficient and vapor pressure of benzene
E. Bich, H. Hendl, T. Lober and J. Millat (Rostock, Germany) 199–211
Thermodynamics of hydrogen-bonding mixtures: G^E, H^E and V^E of propylene glycol + ethylene glycol
J.D. Olson and D.R. Cordray (South Charleston, WV, USA) 213–223

Phase equilibrium measurements in gas-condensates
K. Chylinski (Warsaw, Poland), K. Djamarani, I.W. Drummond, G. Saville and W.A. Wakeham (London, UK) 225–235
Vapor–liquid equilibrium for systems comprised of a non-volatile strong electrolyte in a mixed solvent
S.-K. Oh and S.W. Campbell (Tampa, FL, USA) 237–248
The thermal conductivity coefficient of polyatomic molecules: benzene
P. Ravi, S. Murad (Chicago, IL, USA), H.J.M. Hanley (Boulder, CO, USA) and D.J. Evans (Canberra, ACT, Australia) 249–257
The viscosity of gaseous ethane and its initial density dependence
S. Hendl and E. Vogel (Rostock, Germany) 259–272
Measurements of liquid thermal conductivity and diffusivity by the transient hot-strip method
U. Groß, Y.W. Song and E. Hahne (Stuttgart, Germany) 273–282
Viscometric properties of n-alkane liquid mixtures
J. Wu and A.A. Asfour (Windsor, Ont., Canada) 283–294

Author index 295
